

LOUDER

CUSACK-MUSIC

BOOST - This is the overall level of the affected signal. The range is from no boost, to over 25dB of clean boost.

IN - This is the input to the pedal. This jack is on the right side middle of the pedal.

OUT - This is the output of the pedal. Plug this either into your amp or into any other effects you want after this effect. This jack is on the right side bottom of the pedal.

DC Power Jack - Used to power your pedal from a DC supply. This has the same pin-out as the standard pedal supplies, tip is ground, sleeve is 9V. Use a filtered supply, especially on high gain overdrive and distortion pedals, since they tend to amplify power supply noise.

Power LED (Green) - When the effect is powered the LED is on.

Power Consumption - ~8mA.
